

Users' Workshop - South African Risk & Vulnerability Atlas

Wednesday, 17 June 2009

ANDRE THERON

Andre Theron is a senior research engineer at the Council for Scientific and Industrial Research (CSIR) in Stellenbosch.

He holds a BEng (Civil) and MSc in Water Engineering (coastal engineering thesis), both from the University of Stellenbosch. Previously he worked for the Department of Water Affairs, where he was mainly involved with operations, construction, project planning, irrigation and engineering services.

For the past 19 years, since joining the CSIR, he has been specialising in coastal engineering. His fields of expertise are primarily sediment dynamics, near-shore hydrodynamic, coastal developments, harbours and dredging, estuarine hydro- and sediment-dynamics, coastal zone management and coastal physical environmental studies/ impacts.
